

Looking for a high-performance, scalable battery energy storage container? Contact us today to discuss your custom solution and take the next step toward smarter, cleaner energy.

Containerized energy storage system All-in-one container range applications in commercial and industrial environments. The containerized configuration is a single container with a power conversion system, ...

The DC side consists of eight 138kWh lithium battery energy units, and the AC side uses MEGA series PCS, through the EMS operation strategy, interacts with the grid in a friendly way, and provides power support for ...

Our 20-foot container storage solution is not only powerful, but also extremely safe. Equipped with a 4-stage safety concept, fire and gas detection system and an explosion protection mechanism, we offer ...

Engineered to support both wind and solar energy, this outdoor system offers a high-capacity storage of up to 5 MWh, making it ideal for large-scale energy needs.

It stores either 3.44MWh or 5MWh of energy, and typically includes the energy storage batteries, battery management system (BMS), power conversion system (PCS), and supporting equipment like cooling ...

The KonkaEnergy 5.015MWh Modular Containerized Battery Energy Storage System (BESS) is a high-performance, utility-scale solution designed for grid balancing, frequency regulation, and micro-grid applications.

Containerized Battery Energy Storage Systems (BESS) are essentially large batteries housed within storage containers. These systems are designed to store energy from renewable sources or the grid and release it ...

We will provide customers with humanized pre-sale private humanized pre-sale private design, full tracking service during the sales process, and after-sales private customer service, to provide ...

This large-scale energy storage container utilizes advanced liquid cooling technology. Its high level of system integration enables easy installation and enhanced efficiency.
