

Organizations preparing now for 2MW+ racks and quantum integration position themselves for competitive advantages as computing transforms. Investment in future-proof infrastructure protects ...

At Schneider Electric, we actively collaborate with NVIDIA, and the 800 VDC sidecar is the first solution on the way to 1 MW IT racks.

Optimizing kW per rack can lower costs, improve sustainability, and ensure reliable performance. This guide explains why kW/rack matters, how to calculate it, and best practices for ...

While a standard rack uses 7-10 kW, an AI-capable rack can demand 30 kW to over 100 kW, with an average of 60 kW+ in dedicated AI facilities. This article provides a condensed analysis ...

Full rack with 72 NVIDIA Blackwell GPUs, 36 NVIDIA Grace CPUs and 5th-gen NVIDIA NVLink, enabling trillion-parameter LLM inference and training. Supports liquid cooling and scale-up ...

CoolIT's CHx2000 CDU delivers 2MW of liquid cooling in a standard rack, setting a new bar for AI and HPC data center performance.

These racks accept two conductor 800 V feeds, and utilize DC/DC conversion in the compute rack to drive the GPU devices. Eliminating rack-level AC/DC conversion elements frees up ...

US data center firm Switch has launched a new data center design it claims can support up to 2MW per rack. The company has also expanded its available debt financing to \$10 billion.

Delta manufactures a 42U rack system to suit the needs of nearly any business, regardless of its size, industry, or application. These modular racks are a breeze to install, to upgrade, and to maintain.
