

One such breakthrough was recently announced out of a collaboration between a company called SolarCycle and Arizona State University. Together, they were able to successfully ...

SNR 50 offers high light transmission and solar protection, helping to reduce lighting, cooling, and heating needs.

A new study has found that solar panels, which are made with 50% recycled glass, perform just as well as new ones.

SolarCycle announced a breakthrough in solar circularity with the successful development of a proof-of-concept solar panel made with 50% recycled glass from end-of-life solar panels.

Pilkington Solar-E(TM) products can be used in single glazing applications provided that the coating faces the interior of the building. They provide attractive solutions to various applications where good light ...

Advantage of nano ceramic film :Blocking 99% of the UV, care of your skin, creating a comfortable interior environment. High heat insulation rate, effective saving fuel consumption, environmental ...

Combine Solarcool® glasses with Vitro Architectural Glass (formerly PPG Glass) tinted glasses, such as Solargray®, Solarbronze®, Solarblue®, Azuria®; or Pacifica®, to produce an even greater range of ...

SOLARCYCLE has revolutionized solar panel recycling through a groundbreaking collaboration with Arizona State University. Their proof-of-concept solar panel incorporates 50% ...

SOLARCYCLE and Arizona State University built a solar panel with 50% recycled glass, and it performed just like a new one.

Arizona State University and SOLARCYCLE have developed a solar panel using 50% recycled glass, showing equal efficiency and supporting circular manufacturing in the US.
