

Australia's planned wind solar and energy storage projects

Discover the largest upcoming BESS projects in Australia, from the 2.4GW Denman Battery to the Waratah Super Battery.

Together with states and territories, the Government considered generation, storage and transmission projects across Australia. The resulting list delivers five renewable and storage projects ...

The Australian government, in conjunction with states and territories, has announced a list of renewable energy generation, storage, and transmission projects of national significance that...

The list, created through collaboration with the federal government and its states and territories, aims to provide coordinated support for regulatory planning and environmental approval ...

Australia's solar and energy storage sectors delivered strong performance during the third quarter of 2025, with grid-scale solar generation reaching 1,699MW average output while...

We have collaborated with states and territories to create the National Renewable Energy Priority List (Priority List), which will provide coordinated support for regulatory planning and ...

Discover 10 major renewable energy projects in Australia, including wind, solar and battery storage, and the job opportunities shaping the clean energy sector.

Australia's renewable energy sector is set for significant growth with the announcement of 19 new projects under the Capacity Investment Scheme (CIS) Tender 1. The projects will ...

Australia's latest CIS Tender 4 has delivered a landmark set of 20 clean energy projects, totaling to a massive 6.6 GW of renewable capacity and 11.4 GWh of battery storage. These are ...

Here we provide a snapshot of renewable energy projects that are under development around the country which will soon be feeding clean, low-cost energy into the Australian electricity market.

Australia s planned wind solar and energy storage projects
