

1.Applicable Module Size:1640-2600\*992-1500mm; 2.Feeding:suck glass automatically on the conveyor line,can set lack of material reminder; 3.Pick up paper:Pick up paper automatically and put it into ...

The automatic glass loading machine in a photovoltaic production line is the starting point and core equipment of the module encapsulation and lamination process.

Looking for a reliable robot glass loading machine for your automatic solar module production line? Explore our high-quality and efficient options now!

Full auto solar glass loading machine can grab the glass and place it on the conveyor line automatically - We provide solar panel production line, full automatic conveyor with full automatic laminator, full ...

Our portfolio includes not only automatic solar panel production lines, but also ...

Single corner tilting design to break vacuum suction during glass pick up. Air& electricity failure protection. With dust removing function.

Our portfolio includes not only automatic solar panel production lines, but also individual equipment for PV modules production, from glass loading equipment at the beginning to solar panel assembly and ...

The auto glass loader is an automated material handling system designed for solar panel and glass manufacturing lines. It ensures precise, high-speed loading of glass substrates onto production lines, ...

The glass carrier suction cup is made of polyurethane material, which will not imprint the glass in the absorption process. The whole machine is equipped with a safety fence for safety protection.

Automatic Glass loading Other equipment Description The automatic glass loading system loads glass at the beginning of the assembly process or in the second glass loading area.

Glass loading machine Model: RO-BL02 Glass moving robot arm will move the glass to the transmission line and the paper picking robot arm remove the paper at the same time.
