

## Base station battery grounding wire is the longest

Unless you have a good RF ground such as a network of radials within arm's length of the transceiver, connecting your rig's ground lug to some sort of ground is unlikely to be very helpful, ...

I'm including a master cutoff switch in my battery configuration so the connection one side of the switch to the frame is short while the connection from the other side of the switch to the ...

While some cables are shorter or thicker, this set's balanced length and premium materials ensure a stable, long-lasting ground point. Trust me, this product stands out for its quality ...

A sketch of the grounding and lightning protection system is provided showing test point and where services enter the facility. The sketch should also show the location of the probes during the ground ...

I've been a mechanic for a long time, and I can tell you that a huge percentage of electrical failures in a vehicle can be traced directly to a faulty ground. Using one that is "too large" is always better than ...

Thanks for the add, cb guy back in the 80s, still have my super cheetah 40 ch. recently purchased a Tecsun PL330 sw radio. Started with a long wire then a log antenna but having issues with RF noise ...

In setting up a base station, placing an 8' ground rod into the ground directly below the antenna is recommended. Run a #8 solid copper ground wire from the U-Clamp, attaching the antenna to the ...

To make sizing easy, the chart below outlines the recommended battery ground cable sizes based on current draw (amperage) and cable length. This reference ensures your system runs ...

A ground rod would be driven into the ground within a couple feet of the base of the mast. A heavy copper wire (#6 AWG) or larger would be used to interconnect the mast to this ground rod.

Connect the ground bonding wire from Shoresides truck, before grabbing the filler nozzle. I guarantee that if your tank has been in your pickup for 25 years, it's grounded somehow to the ...
