

KenGen has commissioned its first Battery Energy Storage System (BESS) in Nairobi to power its modular data center, ensuring uninterrupted renewable energy supply.

The BESS project has been identified as a possible solution to increased proportion of intermittent energy to the Kenyan power system and energy curtailment during off peak hours. The ...

NAIROBI, Kenya, Feb 3 - Kenya has renewed its call for faster deployment of solar energy and battery storage as Intersolar Africa 2026 officially opened at the Sarit Expo Centre in Nairobi, ...

The 1.16 megawatt-hour (MWh) Battery Energy Storage System (BESS) will serve the company's 52-kilowatt modular data centre at its headquarters in Nairobi. A BESS is an ensemble of...

According to a report by ESI Africa, KenGen is considering a pilot installation of BESS capacity across several key regions, including the Central Rift, Coastal Region, Mount Kenya, ...

With the right mix of policy, innovation, and investment, it can become a continental leader in energy storage too. BESS can not only stabilise the grid but also accelerate investments ...

To facilitate this, a pilot installation of the BESS capacity is being considered for several key regions, said KenGen. This includes Central Rift, Coastal Region, Mount Kenya, Nairobi, North ...

The Kenya Electricity Generating Company (KenGen) has unveiled its first Battery Energy Storage System (BESS) at its Nairobi headquarters, a move aimed at powering its modular data ...

Discover how Kenya's energy storage battery sector is revolutionizing renewable energy adoption and addressing power challenges. This article explores key applications, market trends, and success ...

The Kenya Electricity Generating Company PLC (KenGen) has unveiled its first-ever Battery Energy Storage System (BESS) to power its modular data centre in Nairobi.
