

BESS is the fastest growing energy storage technology in Canada and is also the dominant storage technology in terms of capacity and number of sites. All but four projects proposed ...

Skyview 2's battery energy storage system will be supplied by e-Storage, a subsidiary of Canadian Solar. The project will store enough electricity to help meet peak demand for hundreds of ...

Synergies between wind, solar and energy-storage technologies are driving changes on the ground across Canada. There is rapidly growing interest in the joint deployment of these technologies.

The Oneida Energy Storage Project, Canada's largest grid-scale battery storage facility and one of the largest globally, has officially begun commercial operations. Located in Haldimand ...

Canadian Solar and Sunraycer have announced two new battery energy storage projects totaling 503 MWh in Texas, supporting ERCOT's grid reliability and advancing renewable integration. ...

By integrating advanced energy storage solutions with meaningful Indigenous partnerships, this project enhances Ontario's clean energy grid and sets a global benchmark for ...

Three experiments are contributing to this multi-year thermal energy storage research project, which is one of many projects underway in the first phase of the CEDIR Initiative - CEDIR Labs.

While regulatory frameworks can be expected to become more and more supportive of new storage initiatives, including both projects and research, efforts to establish more storage ...

Canadian Solar Inc. announced today that its battery subsidiary e-STORAGE, part of CSI Solar Co., Ltd., has signed Battery Storage Agreements (BSA) and Long-Term Services Agreements ...

Aypa Power, a Blackstone portfolio company, develops, owns, and operates utility-scale energy storage and hybrid renewable energy projects across North America.
