

Additional 5000 batteries have been installed through the ACT Government's Next Generation Energy Storage Program. As of March 2025, there are over 10,600 Zero Emission Vehicles registered in the ...

Summary: Exploring the cost dynamics of industrial energy storage cabinets in Canberra? This article breaks down pricing factors, market trends, and cost-saving strategies for businesses in renewable ...

The Australian Capital Territory Government and global energy storage firm Eku Energy have begun construction on the Williamsdale Battery Energy Storage System

Eku Energy has finalized financing for its 250 MW/500 MWh energy storage system in Canberra, contributing to the energy security of the ACT and its ambitious climate goals.

The Australian Capital Territory government has officially switched on its first grid-scale battery energy storage system, describing it as a "significant milestone" on Canberra's pathway to ...

Canberra is taking bold steps towards a sustainable future, with recent initiatives set to transform how we generate, store, and use energy. Here's what you, as a Canberra resident, need to ...

Summary: Explore how Canberra Industrial Park leverages advanced energy storage systems to optimize power reliability, reduce operational costs, and support renewable energy integration.

The large-scale battery storage system will deliver 250 megawatts (MW) of power, store renewable energy and support grid reliability. Enough energy to power one-third of Canberra for two ...

The Canberra CAES project isn't just local news - it's a blueprint for global energy transition. By combining proven physics with modern engineering, compressed air storage offers a pragmatic path ...

Explore the Williamsdale Battery Energy Storage System (BESS) project by Eku Energy, a 250MW/500MWh facility in Canberra. This project enhances energy security and reliability, storing ...
