Will China build a solar power plant in Tashkent?

TASHKENT. Oct 15 (Interfax) - Projects for building a solar power plant and energy storage systems involving Chinese companies have been launched in the Tashkent region of Uzbekistan. A solar power plant valued at \$240 million will be built together with China Datang in the Boka district, the presidential press service said.

Will China Datang build a solar power plant in Boka?

A solar power plant valued at \$240 million will be built together with China Datang in the Boka district, the presidential press service said. It will produce 576 million kWh of electricity a year.

How many kWh will China produce a year?

It will produce 576 million kWh of electricity a year. Two energy storage systems with a capacity of 200 MW and costing \$220 million will be built in the Parkent and Piskent districts together with China Energy Overseas Investment. They will help to avert power cuts during peak hours and provide consumers with a reliable electricity supply.

China Datang has started building a \$150 million, 263 MW solar plant in Uzbekistan for JSC Uzbekenergo.
