

# Construction of new energy storage projects in Serbia

The RES Serbia 2025 conference confirmed the significant progress Serbia has made in renewable energy over the past year. With new wind and solar power plants, successful RES auctions, and ...

Fortis Energy has secured a construction permit for a 270MW PV plant combined with a 72MWh battery energy storage system in Serbia.

In this setting, long-duration energy storage becomes the missing system layer between Serbia's renewable ambitions and its operational reality. By the end of 2025, Serbia had installed approximately 1.6 ...

Serbia's project to build 1 GW of new solar capacity, coupled with storage, is expected to enter the construction phase in 2026, the country's minister of mining and energy said today, noting that this ...

In a significant move for the energy landscape in Southeast Europe, Serbia is advancing a strategic partnership between EPS Elektroprivreda Srbije and the Hyundai Engineering-UGT Renewables ...

Summary: Belgrade's ambitious 100 billion energy storage projects aim to transform Serbia into a regional leader in renewable energy integration. This article explores the scope, technologies, and economic impact ...

This hybrid solar and storage project represents a strategic investment aimed at enhancing grid reliability, integrating renewable energy, and reducing dependence on fossil fuels. Once operational, it will ...

The Serbian government has called for the development of a spatial plan for six large-scale solar plants with a cumulative capacity of 1 GW that will be colocated with two-hour battery energy storage ...

? Strategic Milestone: Serbia to Kickstart Construction of Massive 1 GW Solar-Plus-Storage Project with Hyundai Engineering in 2026! ??? Serbia is set to significantly transform its ...

T&#252;rkiye's Fortis Energy has secured a construction permit for 270 MW of solar alongside 72 MWh of battery energy storage to be built in northwestern Serbia.
