Who are the authors of solar photovoltaic system cost benchmark 2021?

Feldman,David,Vignesh Ramasamy,Ran Fu,Ashwin Ramdas,Jal Desai,and Robert Margolis. 2021. U.S. Solar Photovoltaic System Cost Benchmark: Q1 2020. Golden,CO: National Renewable Energy Laboratory. NREL/TP-6A20-77324.

What are the benchmarks for PV & energy storage systems?

The benchmarks are bottom-up cost estimates of all major inputs to typical PV and energy storage system configurations and installation practices. Bottom-up costs are based on national averages and do not necessarily represent typical costs in all local markets.

What do we model for utility-scale stand-alone storage systems?

The major storage components we model for utility-scale stand-alone storage systems are the same as those summarized in Figure 17 (page 27) and Figure 18 (page 28) for the commercial stand-alone storage model. Table 8 lists our model inputs and assumptions for such a utility-scale energy storage system.

How much does a PV system cost?

For instance,if the battery-based inverter fails to operate,the PV system could operate independently as long as the grid is up. Total System Cost = $\$311.28 * P + \$300.24 * P * H$ with an R squared value of 99.8. PV (100-MWDC) and storage (60-MWD/AC/240-MWhUsable,4-hour-duration) systems sited in different locations (\$179 million).
