

Electric vehicle policy saint vincent and the grenadines

The Government of St. Vincent and the Grenadines is currently executing a project to test and analyze the effectiveness and cost of operating alternative energy-driven vehicles on the terrain of St. Vincent ...

Electric vehicles are particularly environmentally friendly because they consume little to no fossil fuels, have fewer moving components that need to be maintained, and have minimal operating expenses ...

Welcome to the official website of the Government of Saint Vincent and the Grenadines.

Saint Vincent and the Grenadines Electric Vehicle Market is expected to grow during 2024-2030

Because they are more efficient and have lower energy costs than gasoline or diesel cars, electric cars are more affordable to refuel than those powered by those fuels. The use of electric vehicles ...

The main objectives of the new regime are to reduce import taxes on motor vehicles whilst encouraging citizens to choose newer, more efficient, motor vehicles with smaller engines (below 1,600cc), ...

The intention of this policy is to increase the adoption of electric vehicles in keeping with the country's commitments to promote a green economy and reduce the country's carbon footprint.

The main objectives of the new regime are to reduce import taxes on motor vehicles whilst encouraging citizens to choose newer, more efficient, motor vehicles with smaller engines (below 1,600cc), hybrid and electric.

In an effort to encourage the importation of newer, more energy efficient vehicles with smaller engines, the government has announced a number of customs and excise duty revisions.

The ERC also includes sectoral data and information on policies and regulations; workforce; training and capacity building; and related areas.
