

Coupled with energy storage, the solar power assets will provide clean energy during non-daylight hours, grid stability, and facilitate further integration of solar power in the country's energy mix.

On a year-to-date basis, total net electricity production increased by 3.0% in the first four months of 2025. Electricity generation from fossil fuels increased by 1.1% year-on-year in the OECD in April 2025.

Imagine a world where solar farms don't waste energy when the sun sets. That's exactly what the Lobamba Energy Storage Power Station Project aims to achieve. As Africa accelerates its renewable ...

Next-generation thermal management systems maintain optimal operating temperatures with 40% less energy consumption, extending battery lifespan to 15+ years. Standardized plug-and-play designs ...

As global energy demands surge, the Lobamba New Energy Storage Industry Foundation emerges as a game-changer. This article explores how advanced energy storage solutions are transforming ...

There are several ongoing projects that are geared to improve Eswatini's citizens access to electricity. The current access rate stands at 82%. Eswatini is ranked number 3 in the Southern African region ...

Global Energy Consumption How Is Global energy Consumption Changing year-to-year? Primary Energy Consumption Per Capita: Where Do People Consume The Most Energy? Where Is Energy Consumption Growing Or Falling? Electricity generation Energy Production and Consumption by Source This page focuses on total energy and electricity consumption, without digging into the details of where this energy comes from, and how sources are changing over time. In our pages on the Energy Mix and Electricity Mix, we look at full breakdowns of the energy system; how much of our energy comes from fossil fuels versus low-carbon sources; and whe... See more on our world in data.
