

Taxpayers should carefully evaluate the application of these changes to their thermal energy storage system projects. The rules outlined in this section apply to property placed in service in tax years ...

Eligibility for the IRC Section 48 ITC depends, among other criteria, on the type of energy property used in the clean energy projects and whether it meets certain requirements.

The energy storage industry has continued to progress over the course of 2024 and into 2025, buoyed in significant part by the federal income tax benefits in the form of tax credits enacted ...

The Inflation Reduction Act (IRA) of 2022 allowed energy storage systems to qualify for Investment Tax Credit (ITC) for energy storage technologies. This change has opened the door to a large pipeline of ...

To qualify for the highest tax credits available for energy storage projects, you need to understand the relevant provisions established under the Inflation Reduction Act (IRA) and additional ...

To calculate the amount your § 48 or § 48E project is eligible for, multiply the applicable tax credit percentage by the "tax basis," or the amount spent on an eligible unit of energy property or qualified ...

More challenging "beginning of construction" rules apply. Energy storage projects: Qualify for greater tax credit amounts if storage capacity is under 1 MW, or if the project satisfies ...

In this installment of Andersen's Sodium Podium, the authors discuss the differing property tax and sales tax considerations regarding battery energy storage systems and examine the ...

For energy storage technology, the threshold of these non-PFE costs starts at 55% for projects beginning construction in 2026. This required percentage of "clean" inputs increases steadily ...

According to our 2025 mid-year market intelligence report, investment tax credit (ITC) pricing for standalone and hybrid BESS ranged between \$0.915 and \$0.945 in the first half of 2025. Larger ...
