

What is electrical switchgear?

Electrical switchgear covers a wide range of essential components within a power system, such as switches, circuit breakers, fuses, isolators, transformers, disconnectors and control centres.

Why is switchgear more expensive than electrical switchboards?

In most cases, switchgear is more expensive than electrical switchboards due to the complexity of the setup and materials that are used for switchgear. At the same time it is also important to note that individually mounted switchboards may be less cost-effective than switchboards that are group mounted.

What is switchgear & how does it work?

Switchgear covers a wide range of components within a power system, such as switches, circuit breakers, fuses, isolators, transformers, disconnectors and control centres. The use of switchgear makes it possible for companies and domestic establishments to switch on and off the power.

What is a switchgear cabinet manufacturer?

A switchgear cabinet manufacturer is a company that produces switchgear cabinets. A switchgear cabinet consists of the doors and interior components that make up the cabinet and its functions. At Logstrup we do not only manufacture our own cabinets, but also support our customers with their existing cabinet solutions.
