

Explore the 5 Largest solar power plants from around the world. From systems in China, India and the United States.

The SunRise Building, an apartment complex in Alberta, Canada, has answered that question -- and is now the title holder of the Guinness World Record for the largest solar panel mural on Earth.

We specialize in the sale and installation of solar systems for agricultural and commercial entities across the Central Valley, stretching from Sacramento to Bakersfield.

Shanghai has approved the Fengxian 1# offshore photovoltaic project, the first commercial-scale solar-wind hybrid of its kind in China. The move marks a major step forward in the ...

China is using the high-altitude expanse for immense solar panel farms and wind turbines and has begun work on the world's largest hydroelectric dams.

Japan's very ambitious lunar solar power plan -- often described in media as a 6,800-mile (? 11,000 km) ring of solar panels around the Moon -- with real technological details and credible ...

Discover the world's biggest operational solar farms and the mega projects set to reshape tomorrow's renewable energy landscape.

China has unveiled plans for a space power station at an altitude of 36,000 km, where sunlight is constant and 10 times more intense than on Earth. Apparently, it will be collecting energy around the ...

China is proposing to build a huge solar power station in space. The efficient solar panel setup would measure 0.6 miles across. Energy is converted to microwave radiation and beamed to ...

Space solar panels sound like science fiction, but according to a new study, they could make a big difference pretty soon.
