

High-Temperature Resistant Solar Containers for Wastewater Treatment Plants Government Procurement

Whether under extreme heat conditions or at sub-zero temperatures - we ensure that your containerised wastewater treatment plant works efficiently, stably and for a long time. Turnkey, plug & play ...

The water treatment container is designed to produce hygienically clean and cooled drinking water as well as demineralised water for steam production and for different applications in the selected SophiA ...

Our containerized wastewater treatment plants are not only installed in hard-to-reach places abroad, but also offer the perfect solution for short-term, temporary wastewater treatment in Germany.

Biocell Water containerised wastewater treatment plants offer a fast and effective above ground portable wastewater treatment system solution for any site, without the need for any existing ...

BESS Container Water Treatment systems are wastewater plants" compliance fortress: zero-emission backup power for pumps/aeration during grid fails. Avoid flush-related fiascos, ...

Ultra-high temperature ceramics (UHTCs) and their composites, known for their excellent oxidation resistance and ablation performance, are regarded as highly promising non-ablative thermal ...

Both heterogenous and homogenous photocatalysis techniques employed for wastewater treatment are critically reviewed. For treating domestic wastewater, solar desalination technologies ...

In the Task 62 Technology Position Paper you list several actions needed to increase the use of solar thermal energy for water treatment. One action item is that solar reactor concepts need ...

BioKube offers containerized wastewater treatment plants for easy setup and relocation. This solution is ideal for remote locations such as mining camps and oil rig sites.

Within IEA SHC Task 62 experts worked intensively together to identify new collector technologies and new applications in the field of solar energy in wastewater treatment.
