

630W double-sided double-glazed PV module adopts high-efficiency monocrystalline silicon cells with double-sided power generation capability, featuring high transmittance, long service life and low ...

D-Mini is compact, extraordinary, and compatible with more applications to provide efficient gains. Our industry-leading module power contributes to a conversion efficiency of 22.8%. Bifacial ratio reaches ...

Mogen Solar MG10 Perc monocrystalline single glass 540-555Watt photovoltaic solar panel. The new series integrates 182mm silicon wafers, with perc, multi-busbar cell technology and high-density ...

ZXM6-DD72 Series. Znshine Solar's Bifacial PV modules.

As renewable energy continues to evolve, monocrystalline double-sided solar panels are gaining traction for their efficiency and versatility.

It boasts over excellent low light performance, low temperature coefficient and super low degradation. And because of its bifacial power generation ability, this solar module has 10%-35% power increase ...

At present, the company's main components such as large-size multi main grid half, double-sided double glass and high-efficiency half have considerable market competitive advantages in capacity ...

In addition, the glass structure of the double-glass double-sided module is more resistant to abrasion and corrosion, IP66, and the fire rating has also been upgraded from C to A of common crystalline ...

Double glass modules use an innovative design with glass on both sides, offering higher photovoltaic conversion efficiency and better environmental characteristics.

The new double-sided n-type Silk® Nova Duetto high efficiency glass/glass panel with 132 half-cut cells, with a power range from 620 to 630 Watts, completes the FuturaSun model range.
