

How much commission do you get from selling a photovoltaic panel

How is solar sales commission calculated?

Salespeople who generate many leads or who sell a high volume of solar products may also be eligible for additional bonuses. Therefore, there is no set formula for how solar sales commission is calculated, as it can vary depending on several factors. [How To Sell Solar Panels?](#)

What factors affect a solar salesman's Commission?

The size of the sale is also a factor that affects a solar salesman's commission. For example, if a solar salesman sells a \$10,000 solar system, their commission will be higher than if they sell a \$5,000 solar system. Additionally, some companies offer bonuses or commissions for meeting or exceeding sales targets.

How much does a solar company pay a salesperson?

The amount of the commission is typically a percentage of the total solar system price and varies based on the company, the solar product, and the salesperson's experience. In most cases, the solar company will upfront a portion of the total expected commission to the salesperson, and then pay the rest after the sale is complete.

How much does a solar dealer make?

Most solar dealers are independent contractors who work for a solar company or distributor. They typically earn a commission on each sale they make. The average commission for a solar salesman is about 10% of the total sale price. So, if a solar salesman sells a \$10,000 solar system, he or she will earn a \$1,000 commission.
