

# How to install photovoltaic panels as a whole waterproof

In this article we have brought you the answer to this question with a step-by-step process to completely waterproof the solar panel.

Step 1: High Rise Panel Stand Step 2: EPDM Tape Step 3: Drainpipe Conclusion The high-rise panel stand, is the primary factor to keep solar panels waterproofed as the stand with a minimum height of 7 to 8 feet allows the solar panel to not to touch the ground and it can get dry as the wind passes below the solar panels. Generally, the stand is set aligned with the wall of the roof that can rise up to 10 feet. This stand will... See more on [loomsolar](#).
