

# Interpretation of wind power plant loan policy

Can a wind project be financed by a project company SPV?

2 It should be noted that loans made directly to the project company SPV are rare for wind projects as they have adverse impacts on the tax equity investors, and hence most debt financing for wind projects is back leverage debt incurred above the project company SPV.

Does a wind project need debt financing?

Back-Leverage Debt. Because of the need to monetize the PTCs and depreciation through a tax equity financing, most wind projects do not utilize debt financing at the project company level.

How do you finance wind energy?

Options include bank loans, bonds, Government grants and subsidies and Power Purchase Agreements (PPAs). Below we share more details and insights on a variety of methods for financing wind energy: Project financing is a popular method involving the creation of a SPV that isolates the project's financial risk from the developer's other activities.

Why should we invest in wind power?

Investment in both onshore and offshore wind power is key to not only energy security, but also wider social and economic benefits through the creation of jobs and investments in local communities around the world. Financing wind farms requires substantial capital investment, necessitating a combination of equity and debt financing.
