

Despite cloudy skies, Ireland is embracing solar power. Private homes and farms across the country generate clean energy, cut bills, and help meet climate targets

Ireland's solar association, Solar Ireland, has announced that Ireland has surpassed 1 GW of installed rooftop solar capacity.

Ireland celebrated a landmark moment in its clean-energy transition, with national solar capacity surpassing 2 GW for the first time. This milestone reflects the remarkable pace of growth in ...

In conclusion, solar power is playing a vital role in Ireland's energy transition, with several major solar farms currently under construction or completed. The use of battery storage systems and ...

"Ireland has made huge progress in our journey to renewable energy. Wind power supplied approximately one third of national electricity demand in 2024, with renewables accounting for ...

Ireland's solar energy increased by 49% in the last year and by 160% since 2023, new figures show today. Solar Ireland said solar power is now meeting the electricity needs of over...

"Operating a power system with electricity generated from variable renewables such as wind and solar, mixed with conventional generation, is complex and technically very challenging.

Ib vogt finalised divestment of a portfolio three solar photovoltaic projects in Ireland, valued around EUR230m (\$271.7m), with capacity 272MWp.

Ireland Targets 8GW Solar by 2030: Achieving the Ireland solar energy target Ireland is on a determined path to reshape its energy landscape, with solar power playing a pivotal role. The ...

Dublin, 13 November 2025 - Ireland celebrated a landmark moment in its clean energy transition, with national solar capacity surpassing 2 GW for the first time. This milestone reflects the remarkable ...
