

## Is adding photovoltaic panels considered a renovation

Should you add solar panels to your new home?

Adding solar panels to newly constructed homes can increase the sale price, attract new customers, and distinguish a homebuilder and their homes among competitors. A SETO-funded study found that homeowners across the country have been willing to pay a premium for homes with an average-size solar array.

Can solar PV be used in New construction?

Integrating solar photovoltaics (PV) into new construction is becoming more and more popular in the United States. In California, rooftop solar PV became a requirement on newly built homes starting in 2020 and in some cities, this rule also applies to major renovations.

Should you buy a home with solar panels?

A home with solar panels has lower electricity bills than an equivalent home without solar panels. Over the life of the solar system, the savings exceed the higher up-front price of the home. Homebuilders can share information with consumers about financing options and incentives described in the Homeowner's Guide to Solar.

Do you need a professional to replace solar panels?

Solar panel replacement should always be performed by a professional, and safe disposal of the equipment is essential, as over 85% of a PV module can be recycled. In this guide, learn how to add solar panels to an existing system, the benefits of expanding your array, and when the cost of adding solar panels is worth it.
