

Italy installs solar power generation system

Italy brought online 6,437 MW of new solar photovoltaic (PV) capacity in 2025, registering a 5% year-on-year decline due to a drop in residential and commercial and industrial (C& I) ...

Italy has exceeded 2 million grid-connected photovoltaic (PV) installations, establishing solar power as a cornerstone of the national electricity system. According to Italia Solare, this milestone represents a ...

According to data processed by Italia Solare based on Terna's Gaudì database, Italy has achieved a significant milestone by exceeding 2 million photovoltaic (PV) systems connected to the ...

Italy's cumulative installed solar PV capacity reached 43.5 GW at the end of December 2025. Of this total, 27% (11,627 MW) comes from residential systems, 43% (18,850 MW) from ...

In 2024, Italy achieved its strongest year of solar growth in over a decade, installing 6.7 GW of new photovoltaic (PV) capacity and bringing cumulative capacity to 37 GW. PV generation reached 36 ...

During the first 7 months of 2025, Italy added 3.35 GW of new solar PV capacity, according to local solar energy association Italia Solare. By July 30 this year, the country surpassed ...

Italy's solar energy sector is experiencing a significant surge, solidifying its role as a key player in Europe's renewable transition. Between January and August 2025, the country installed an ...

Italy's solar sector added 6.4 GW in 2025, reaching 43.5 GW total. Growth was driven by large-scale plants, offsetting declines in residential and commercial installations.

Italy's cumulative solar installations have exceeded 40GW, with more than two million solar systems now in operation in the country across the utility-scale, commercial and industrial...
