

It serves as a device for receiving and distributing electric energy, as well as for controlling, monitoring, and protecting electrical circuits. It can be used in single busbar, single busbar segmented, or double ...

KYN28-12 indoor AC armored removable metal-enclosed switchgear is used in three-phase AC power system with rated voltage of 12kV and rated frequency of 50Hz for receiving and distributing electric ...

Download KYN28A-12 (Z) Metalclad AC Enclosed Switchgear, Withdrawable Type datasheet, manual, and related Distribution product catalogs from CHINT Global

For the purpose of getting the detailed temperature distribution in the switchgear, a series of temperature rise tests were carried out based on the KYN28A-12(Z) ...

Widely used across power plants, substations, industrial facilities, renewable energy systems, and commercial buildings, the KYN28A-12 Switchgear ensures safe and efficient power ...

The cabinet is made of aluminum-zinc coated sheet processed by CNC equipment, and is assembled by bolts or rivets. The structure is fully assembled. The switchgear is equipped with high-performance ...

If the switch cabinets are arranged along a single side, the corridor before cabinets ought to be larger than 2.5m; and if these cabinets face each other with two rows, the corridor between cabinets ought ...

It can be equipped with VS1-12 series or imported VD4 series vacuum circuit breakers, with wide applicability, high reliability, and long-term maintenance-free.

KYN28A-12 metal armored withdrawable switchgear is an indoor complete distribution device suitable for 3.6-12kV, three-phase AC 50Hz single busbar and single busbar segmented systems.

KYN28A-12 is with metal armoring design and its enclosure protection can be IP4X. Its incoming/outgoing hole of power cable and control cable are sealed by rubber sealing ring, so no ...
