

Oudomxay Province on 13 December officially inaugurated a 1,000-megawatt solar power project, marking one of Laos' largest renewable energy developments to date. The facility was developed by ...

Recently, CPIH and its partners signed a memorandum of cooperation for the Oudomxay New Energy Base project with the Ministry of Planning and Investment, the Ministry of Energy and Mines, and the ...

Once put into operation, it will be the largest floating solar power project in the world. In 2021, French energy giant EDF also planned to build a 240 MW floating solar power plant at the Nam Theun 2 ...

Convall Energy-Attapeu Solar PV Park is a ground-mounted solar project which is planned over 850 acres. The solar power project consists of 460,000 modules. The project construction is expected to commence from ...

It is the first large-scale solar project in Laos developed by a Chinese company. The initial phase of the project has a capacity of 50.1 MW, along with a 10 MWh energy storage system.

To access additional data, including an interactive map of global solar farms, a downloadable dataset, and summary data, please visit the Global Solar Power Tracker on the Global Energy Monitor website.

This forward-looking perspective article presents a status overview of solar photovoltaic-thermal (PVT) panels in net-zero energy buildings from various points of view and ...

This project is a step in advancing renewable energy efforts for both Laos and China. The solar farm, located near the Laos-China border, aligns with Laos's goal to increase renewable energy consumption ...

Construction has commenced on the first phase of the one-million-kilowatt photovoltaic project at China General Nuclear Power Corporation (CGN)'s clean energy base in northern Laos.

The CGN photovoltaic project will start in December 2024 and is expected to be completed and put into operation at the end of December this year, with an average annual power generation of more than ...
