

So-called "hybrid" c-Si PV cells and modules that also contain a layer of thin film are covered by the scope, consistent with the Department's scope rulings in the Solar I China case.

Chinese PV cell and module manufacturer SolarSpace has started cell production at its latest manufacturing facility, a 5GW factory in the Saysettha Development Zone in Laos, near the Thai border.

On August 6, 2025, the U.S. Department of Commerce (Commerce) initiated an antidumping duty investigation to determine whether Crystalline Silicon Photovoltaic Cells, Whether or Not Assembled ...

Researchers are interested in determining the economic viability of new sources like photovoltaic panels that utilize solar energy, which is a promising market within the renewable industry (Kim et al., 2014; ...

China-based SolarSpace, a well-known solar cell vendor recently turned module maker, is unique in that it has built production capacity in Laos. The company's Corporate Vice President, ...

As the photovoltaic (PV) industry continues to evolve, advancements in Hui Lao Hu talks about photovoltaic panels have become critical to optimizing the utilization of renewable energy sources.

After aggressive tariffs imposed by the US government on imports from Vietnam, Malaysia, Thailand and Cambodia, manufacturers in Laos and Indonesia have managed to increase ...

Because the Petitions were filed on July 17, 2025, pursuant to 19 CFR 351.204 (b) (1), the period of investigation (POI) for the India, Indonesia, and Laos LTFV investigations is July 1, ...

Also excluded from the scope of these investigations are off- grid crystalline silicon photovoltaic panels in rigid form with a glass cover, with each of the following physical ...

Watch how smart robots help clean photovoltaic cells at a company in Hubei, China.
