

The floating solar power plant will not only contribute to North Macedonia's renewable energy capacity but also help mitigate climate risks. The Kozjak reservoir, integral to the country's ...

With 900 MW of installed capacity, North Macedonia's solar sector is scaling rapidly, while battery storage is gaining momentum. Find out more in our daily focus, 15-18 September. ...

Solar capacity expanded strongly in 2025, driven by both large-scale investors and households. The Energy Ministry describes itself as an active driver of the transition, focusing on ...

Completed in 2023, the FEC Novaci solar power plant is already a symbol of North Macedonia's renewable ambitions. Spanning 57 hectares, the plant boasts an installed capacity of 55 ...

Battery licensing begins as 60 MW milestone nears, and 4 GW of storage proposals await review. North Macedonia has issued its first two licenses for battery energy storage system (BESS) ...

This report, "North Macedonia Renewable Energy Market - 2025 Update", has been produced by Invest In Network as part of the Energy Week Western Balkans 2025 framework.

North Macedonia's plan for 2026 includes 67 power plant projects of at least 1 MW each, for investments totaling an estimated EUR 3.74 billion, and 96 accepted proposals for standalone ...

North Macedonia's home energy storage production base combines cost efficiency, market access, and sustainability - three pillars for success in today's renewable energy race.

The continued growth of solar power and the development of storage capabilities will play a decisive role in securing North Macedonia's energy independence and promoting a sustainable ...

According to the national plan, there are 82 proposed units (including for storage) of more than 10 MW, which means they would be connected to the transmission network.
