

With tourism contributing 5% to GDP and manufacturing sectors expanding, reliable electricity isn't just convenient - it's economic oxygen. But how can a nation with frequent power outages achieve this? ...

These projects include installing solar cold storage units in rural areas, solarising healthcare facilities to ensure uninterrupted power supply, and implementing solar water ...

The solar panels power the AC units during sunny periods and the grid fills in the gaps when needed. A minimum of 70V and a maximum of 350V of solar panels are required on the DC input side.

Madagascar, better known for its unique wildlife, is quietly emerging as a laboratory for solar power generation and energy storage solutions - and the results are electrifying.

Global South Utilities (GSU) has secured agreements with Madagascar to develop a 50 MW solar plant and a 25 MWh battery energy storage system (BESS) in the island nation.

Phase 1 of Moss Landing Energy Storage Facility was connected to the power grid and began operating on 11 December 2020, at the site of Moss Landing Power Plant, a natural gas power station owned ...

Toronto Stock Exchange-listed developer NextSource Materials has confirmed that the solar-hybrid-storage development for its Molo graphite project in Madagascar has been completed.

Huijue Group's Home Energy Storage Solution integrates advanced lithium battery technology with solar systems. Ranging from 5kWh to 20kWh, it caters to households of varying sizes.

On June 7, 2025, a complete residential energy storage system comprising a 30 kWh GSL energy storage battery, a 15 kW Solis inverter, and solar photovoltaic panels was successfully installed in ...

On June 7, 2025, a complete residential energy storage system comprising a 30 kWh GSL energy storage battery, a 15 kW Solis inverter, and solar photovoltaic panels was successfully ...
