

Summary: Discover how rooftop solar photovoltaic (PV) panels are transforming energy access in Madagascar. This article explores installation trends, cost-saving strategies, and real-world success ...

In 2024, we successfully delivered an off-grid solar energy solution for a private house in Madagascar, Africa. The project was designed to ensure stable, clean, and sustainable electricity in an area with ...

Discover the 2024 industrial factory rooftop solar project in Madagascar, promoting sustainable energy solutions and innovative solar technologies

Recently, the rooftop distributed photovoltaic power storage project of IVATO Industrial Park in Madagascar has been officially put into operation, with cospowers providing core energy ...

On June 7, 2025, a complete residential energy storage system comprising a 30 kWh GSL energy storage battery, a 15 kW Solis inverter, and solar photovoltaic panels was successfully ...

Construction has begun on a 5 MW solar plant with 3.2 MWh of battery storage off Madagascar's northwestern coast. The project aims to cut local electricity costs and support round ...

Afripower has commenced construction of a large utility-scale solar photovoltaic (PV) power plant at Mandroseza, designed to operate alongside the existing heavy fuel oil (HFO) power ...

Powering a Sustainable future through Innovative Energy Solutions. Your Trusted Turnkey Energy and Agricultural Project Partner.

Madagascar is one of the sunniest countries in the world with more than 3,000 hours of sunshine per year, so decentralised solar power supply to rural areas is not only easier but also cheaper.

The project, which is the first large-scale PV hybridisation of HFO plants in Madagascar, is being carried out in two phases in order to meet deadlines set out by the Malagasy government.
