

They may be configured in series, parallel or a mixture of both to deliver the desired voltage, capacity, or power density. Packs are identified by cell size, number of cells, battery structure, chemistry, ...

Microgreen designs battery modules for solar energy storage, offers custom lithium batteries, 3 kWh to 12kWh lithium batteries, portable power and lead acid batteries.

With electronic devices getting smaller and more compact, there is an increased demand for rechargeable micro batteries that can fit in small spaces. Nichicon produces rechargeable micro ...

MaxAmps lithium battery packs are assembled in the USA with factory fresh lithium battery cells. Our lithium battery packs work best in high performance applications including UAV, drones, and robotics.

Rechargeable micro lithium-ion batteries can be assembled in series and parallel into a micro lithium battery pack to achieve higher voltage or higher capacity.

We provide custom-paired lithium battery chargers to enhance the performance and reliability of our battery packs. This is important especially when customers have unique charging requirements.

Check each product page for other buying options. Need help?

Microvast produces innovative and reliable lithium-ion batteries with advanced technologies. With nearly two decades of experience in battery development, we're accelerating the adoption of clean energy ...

These packs come in specially designed cases with specific shapes and dimensions, so choosing the right fit for your equipment is essential. Fortunately, most are designed for easy installation and ...

Performance lithium-ion battery packs, engineered & manufactured in Los Angeles for the most demanding applications. We are building hundreds of packs a week for FPV, UAS, and robotics ...
