

It adopts door-mounted embedded integrated air conditioning, which does not occupy cabinet space, improves the available space of outdoor cabinets, has better structural integrity at the top, and has ...

The BESS solution delivers utility-grade energy storage for commercial and industrial applications. The system features modular architecture supporting 250kW to 500kW continuous power output with 500kWh-1MWh ...

Available in both 100kWh and 215kWh capacities, this modular system integrates power modules, batteries, cooling, fire protection, and environment monitoring in a compact outdoor cabinet.

This open platform, integrated in the C-Cab, provides access to: o transition from on-grid to off-grid mode via the black start function, o multi-source microgrid autonomous management, o compatibility with third-party ...

Housed in a weatherproof outdoor cabinet, this compact system offers easy installation and reliable operation. It is ideal for small-scale microgrid applications such as villages, telecom stations, and border facilities, ...

ESS-GRID FlexiO is an air-cooled industrial/commercial battery solution in the form of a split PCS and battery cabinet with 1+N scalability, combining solar photovoltaic, diesel power generation, grid and utility power.

Our 500 kW batteries can be deployed in island mode, in parallel with additional BESS, or as part of a hybrid solution, including generators. We deliver reliable and scalable energy storage systems tailored to projects ...

The Microgrid System combines high-density lithium battery storage, MPS Microgrid Cabinet, intelligent EMS control, fire safety, thermal management, and SCADA connectivity -- all pre-engineered and delivered as a ...

Featuring a split PCS and battery cabinet design, it offers 1+N scalability and integrates seamlessly with solar PV, diesel generators, the grid, and utility power.

Combining advanced LiFePO4 battery technology, modular hybrid microgrid energy storage systems, and robust EMS controls, our systems deliver reliable, scalable power from solar, wind, or grid sources.
