NCA batteries are lithium-ion batteries with a cathode made of lithium nickel cobalt aluminum oxide. They offer high specific energy, a long life span, and a reasonably good specific power.

You can subscribe online and then go to your nearest Nickel Point to collect your card. Or do it all directly in Nickel Point.

Discover everything about lithium nickel cobalt aluminum oxide (NCA), the key cathode powder for high-performance lithium-ion batteries. Explore its properties, applications, and more!

Detailed breakdown of NCA battery mechanics, examining the superior energy density balanced against thermal stability and material cost concerns.

That's it, you're all set! Make payments, get your salary, share your IBAN, and track your transactions in real time from the Nickel app or your customer area!

The lithium nickel cobalt aluminium oxides (abbreviated as Li-NCA, LNCA, or NCA) are a group of mixed metal oxides. Some of them are important due to their application in lithium-ion batteries.

You can do this through the web (on your computer) or through your Nickel app on your smartphone. Your login is the 10-digit identification code on the back of your Nickel card.

NCA batteries, or lithium nickel cobalt aluminum oxide batteries, represent a high-performance lithium-ion chemistry widely adopted in electric vehicles and energy storage systems.

Nickel offers everyone 1 Account + 1 Bank Card + 1 RIB in 5 minutes at your tobacconist's to pay and be paid.
