

# Nordic Energy Storage Project Planning for 2025

This event will bring together key stakeholders from across the region to explore the latest trends in energy storage, with a focus on the increasing integration of energy storage into ...

From advanced storage solutions to nuclear innovation, learn how technological breakthroughs are paving the way for a more flexible, efficient and sustainable energy future.

By examining country-specific energy data for Denmark, Finland, Iceland, Norway, and Sweden, the report provides information on what progress has been made in critical sectors such as ...

The Danish Center for Energy Storage has prepared this report "Thermal Energy Storage, Electrification with Flexibility 2025". We believe that thermal energy storage (TES) is a largely overlooked set of ...

Our latest overview of the top 20 battery energy storage projects in Sweden reveals a market that has shifted from cautious pilot activity to industrial-scale deployment in barely two years.

With 96% of electricity now fossil-free and pioneering projects in hydrogen and energy storage, the Nordics continue to lead in sustainable energy. However, swifter action and closer ...

During 2025, Locus Energy has taken significant steps in its Nordic expansion. Earlier this year, a groundbreaking ceremony was held for a 70 MW/140 MWh battery energy storage ...

SEB Nordic Energy's portfolio company, Locus Energy, in collaboration with Ingrid Capacity, will build the largest battery energy storage project in the Nordics.

Computer-generated picture of the future battery storage park in Finland. SEB Nordic Energy's portfolio company, Locus Energy, in collaboration with Ingrid Capacity, will build the largest ...

Sweden leads the Nordic energy storage market, holding the largest market share in 2025. This is due to its strong grid infrastructure, the needs of industrial storage, and supportive ...
