

Nearly 5 GWh of new battery energy storage systems (BESS) will be deployed through hybrid solar-plus-storage projects, signaling the emergence of storage as a core component of the nation's energy ...

The Department of Energy (DOE) of the Philippines endorsed 17 power generation projects to the National Grid Corporation of the Philippines (NGCP) in June 2025, highlighting the country's continued push ...

The Philippine House passed a national energy storage framework to support renewable energy goals and grid stability, now moving to the Senate for final approval.

Developed by TSPI, a wholly owned subsidiary of SP New Energy Corp (SPNEC), the project will connect to the Luzon grid through its own point-to-point transmission network.

ERC, the energy regulator of the Philippines, has approved an application from the world's largest solar-plus-battery project under construction to develop and own its own transmission network.

Engineering and construction are being undertaken by Energy China, PowerChina, and Meralco Industrial Engineering Services Corporation. Located across Nueva Ecija and Bulacan, the project will ...

The MTerra Solar Project, under development by Terra Solar Philippines Inc. (TSPI), a wholly owned subsidiary of SP New Energy Corp, is a 3.5 GW solar and 4.5 GWh battery energy storage system (BESS) spread ...

Recently, the highly anticipated MTerra Solar project, the largest solar-storage initiative in the Philippines, secured grid connection approval from the Energy Regulatory Commission (ERC).

China Energy Engineering Group Guangdong Electric Power Design Institute Co., Ltd. (GEDI) recently signed an EPC contract for the expansion of the 16 MW/19 MWh Magat BESS project in the ...

The total BESS capacity in construction and operation through SNAP in the Philippines is now 160 MW. Batteries are optimal for ancillary services due to their fast response time to correct real-time ...
