

Power grid confidentiality propaganda micro film

This gripping film outlines the shocking facts that a nationwide electric grid collapse becomes more likely with every passing day - and when the lights go out, they won't come back on.

In 1915, General Electric released a silent promotional film titled *The Home Electrical* offering a glimpse into a gleaming, frictionless future. The film walks viewers through a model electric...

The potential failure of the United States' power grid and its implications for the nation are the subject of the new documentary "Grid Down, Power Up," which premieres Sunday, June 8 at 9 ...

Although Texas is on a different power grid than the East and the West parts of the United States, the people are no safer from these attacks. There are no backup plans, no backup ...

Cyber-attacks in a power system can compromise confidentiality, integrity, and availability (CIA) security standards by targeting physical systems via reconnaissance, ...

"Grid Down, Power Up" exposes vulnerabilities in our nation's patchwork of more than 3,000 utility companies, which aren't regulated to protect against outside threats such as malware.

Our power grid is at grave risk of shutting down completely. An orchestrated physical attack, electromagnetic pulse attack (EMP), cyber-attack, or geomagnetic disturbance (GMD) could ...

Does anyone know what technology or techniques allowed us to move away from just "more and more wires" to having big cables that carry power for entire blocks of houses, and split ...

In 1915, General Electric released a silent promotional film titled *The Home Electrical* offering a glimpse into a gleaming, frictionless future. The film walks viewers through a model electric ...

The film follows a campaign worker who quickly learns that while voters might care about a candidate's policies, the media's portrayal of them can make or break their chances.
