

Prefabricated energy storage device in a Portuguese factory

On the standalone side, the Casal da Cortiça facility in Leiria, developed by Infraventus Energy Storage is Portugal's first fully merchant large-scale battery using lithium technology with a power output of 12 ...

This article explores how energy storage batteries are reshaping power management in Portugal's second-largest city, offering actionable insights for businesses and municipalities.

Installed in the southern Portuguese region of the Algarve, the 5MW/20MWh battery system enhances the site's ability to dispatch renewable energy to the grid when it needs it most and ...

The collaboration between Galp and Powin has begun the installation of a large-scale battery energy storage system in Alcoutim, a small town located in the sunny Algarve region of ...

Looking ahead to 2026, we're piloting second-life EV battery arrays with Portuguese automaker AutoEuropa. Early tests show 70% cost reduction compared to new cells - perfect for non-critical ...

StorSystems is driving the Portuguese energy transition by developing, building, and operating advanced battery storage systems. Battery storage allows power produced now to be stored for use ...

These projects include lithium-ion batteries, compressed air energy storage (CAES), and emerging technologies such as green hydrogen and thermal storage.

"Our Castanheira plant is one of the largest installations of its kind, and shows what can be achieved by combining solar with high-performance energy storage technology.

Galp has kicked off construction on five new battery energy storage system (BESS) projects in Spain and Portugal, marking a major step in its clean energy strategy. According to the ...

By pairing the solar installations with advanced lead battery storage, this project is providing an exciting option for energy-intensive manufacturing facilities to reduce both carbon emissions and energy costs.
