

(CUC) -- The Commonwealth Utilities Corporation is in the first phase of its planned renewables program schedule for the implementation of a utility scale photovoltaic solar farm with a ...

Among renewable energies, wind and solar power is among the most in demand. Learn more about our offshore and onshore projects around the world.

Saipan, located in the Northern Mariana Islands, is a highly suitable location for solar photovoltaic (PV) power generation due to its consistent sunlight and high average daily energy yield.

Governor David M. Apatang met with all CNMI regulatory agencies to ensure their complete cooperation with CUC as they put our Request for Proposals for 85 Megawatt of Solar ...

CNMI has its power generation and distribution system spread across Saipan, Tinian, and Rota, where five generation facilities combine to yield approximately 120 MW in design capacity but only 40 MW ...

Namkoo's 10kW solar + 20kWh energy storage system in Saipan has been delivering reliable, independent power for over six months--earning strong praise from our customer. Saipan faces ...

Saipan solar farm is an announced solar photovoltaic (PV) farm in Saipan, Northern Mariana Islands.

By 2025, the plan is to have a 20-megawatt solar photovoltaic (PV) system and a 15-megawatt battery energy storage system (BESS) operational. This initial phase is crucial for setting the foundation for ...

The Office of the Executive Director, Commonwealth Utilities Corporation (CUC) is soliciting competitive sealed proposals from qualified vendors for Independent Power Producer-Solar ...

Namkoo's 10 kW solar kit with 20kWh lithium storage powers Saipan homes with clean, reliable energy. Discover how this off-grid system transforms energy independence in island ...
