

our energy delivery, Walo Storage marks a major technological breakthrough for the country. The installation facilitates the increasing integration of solar energy while avoiding the emission

Described as a first for West Africa, a solar PV installation with battery storage project dedicated to frequency regulation has been commissioned in Senegal.

The installation facilitates the increasing integration of solar energy while avoiding the emission of 26,600 tons of CO₂ annually--the equivalent of the yearly emissions of over 18,000 cars.

This statement underscores the importance of Walo Storage in Senegal's energy landscape and highlights the company's commitment to contributing to a more sustainable energy ...

Senegal has inaugurated a solar power plant equipped with battery storage in the northern Saint-Louis region, marking a milestone in the country's efforts to strengthen grid stability ...

Senegal has begun commercial operations at a new solar energy facility that combines photovoltaic power with lithium-ion battery storage, the first of its kind in West Africa, as the country ...

Senegal and sustainable infrastructure developer Africa REN have commissioned the Walo Storage facility in Bokhol, marking the first grid-connected solar-plus-battery installation of its ...

Senegal has officially inaugurated the "Walo Storage" plant in Bokhol (Saint-Louis Region) on January 22, 2026. This marks a technological milestone as West Africa's first large-scale ...

With the launch of Walo Storage, Senegal's energy sector enters a new era of sustainable solar power and reliability.

Energy Resources Senegal (ERS), through its subsidiary Teranga Niakhar Storage (TNS), has successfully secured financing for the Niakhar Solar + Storage project, a 30 MW ...
