

The Singapore CO₂ redox flow battery market is characterized by a dynamic mix of established multinational corporations, innovative startups, and emerging regional players. Leading ...

The Singapore Aqueous Organic Redox Flow Battery (AORFB) market is poised at a critical juncture, driven by the nation's strategic push towards sustainable energy solutions and energy...

Singapore, 22 October 2024 - Advorio Asia Pacific (Advorio), VFlowTech (VFT), and JTC today signed a Memorandum of Understanding (MoU) to collaborate on scaling up vanadium redox flow battery ...

VFlowTech is a Singapore headquartered deep tech company pioneering vanadium redox flow battery (VRFB) systems for long-duration energy storage. Established in 2018, VFlowTech focuses on ...

VFlowTech, established in 2018 in Singapore, specializes in modular vanadium redox flow batteries for scalable, long-lasting energy storage. Their PowerCube system supports renewable energy ...

We speak to one of its co-founders, Dr Avishek about the company's work and plans for the future. Dr Avishek Kumar co-founded VFlowTech, a Singapore-based company pioneering ...

Vanadium redox flow battery (VRFB) company VFlowTech has raised investment to scale up its manufacturing, extend its reach and enhance the digital capabilities of its tech.

Vflowtech, a Singapore-based innovator, is powering Jurong Island, an industrial hub, with its vanadium redox flow batteries (VRFBs). This project paves the way for a cleaner and more ...

Their flagship product is the PowerCube, a low-cost, modular, vanadium redox flow battery - an alternative to lithium-ion batteries that uses vanadium ions to carry charge, and has a life cycle of up ...

Singapore's VFlowTech has secured a substantial \$20.5M funding round to accelerate deployment of its vanadium redox flow batteries that aim to offer long-duration storage.
