

# Sodium-sulfur battery energy storage container in Osaka Japan

Overview The project has been built at the former site of a liquid natural gas (LNG) terminal and features NAS batteries with 11.4MW output and 69.6MWh storage capacity (~6-hour duration at full rated power).

Japanese manufacturer NGK Insulators' proprietary battery tech features in a large-scale project that has just come online in its home country, as a pilot begins in the US.

A large-scale energy storage project utilizing NGK's NAS batteries has commenced operations in Japan, while a pilot program featuring the same technology is now underway in the ...

Japanese manufacturer NGK Insulators' proprietary battery tech features in a large-scale project that has just come online in its home country, as ...

NGK Insulators' proprietary battery tech features in a large-scale project that has just come online in Japan, as a pilot begins in the US.

In response to these challenges, Japan is actively exploring sodium-ion technology as a viable alternative. Sodium-ion batteries (SiBs) offer several advantages over LiBs, including ...

NGK INSULATORS, LTD. has introduced a Sodium Sulfur Battery System technology -- NAS's battery -- that is currently the only commercially mature, large-scale energy storage technology that can be ...

The new technology elements have been incorporated into the field-proven battery design. These improvements allow projects to be implemented using significantly fewer number of ...

The Japan Sodium Sulfur (NaS) Battery for Energy Storage market is experiencing dynamic growth, driven by evolving consumer preferences, technological advancements, and ...

NGK Insulators has switched on 1 MW/5.8 MWh of NAS batteries under a demonstration project to assess the performance of stationary storage at a site operated by Korea Electric Power ...

At its Board of Directors meeting on October 31, 2025, Japanese ceramics manufacturer NGK Insulators announced that it had resolved to discontinue the manufacturing and sales of its ...
