

Beyond immediate benefits, Solar Control glass contributes to sustainability goals, improving energy efficiency ratings and supporting eco-friendly building practices.

Discover what photovoltaic glass is, how it works, and how to integrate solar energy and automation into homes and businesses efficiently and sustainably.

Let the light in with Mitrex Solar Glass -- a powerhouse in disguise, where photovoltaics meet limitless design, where color meets clarity. You're not just choosing glass; you're choosing a future where ...

Solar glass works by utilizing the photovoltaic effect, which is the process of converting light into electricity. The glass is coated with thin layers of semiconductor materials, such as silicon, ...

Crafted with heat-treated safety glass, our photovoltaic glass provides the same thermal and sound insulation as traditional options, flooding spaces with natural light. Perfect for facades, curtain walls, ...

Now, to meet the specific needs of solar industry customers for tightly specified glass shapes, Glasstech has once again taken the knowledge and ingenuity acquired across the globe to develop and refine ...

SunGuard<sup>®</sup> Solar is a commercial solar control glass that helps to reflect the sun's energy. Making it ideal for applications when excessive solar heat gain could result in uncomfortable living environments.

It allows up to 70% of visible light to pass through while directing the Infrared and Ultraviolet light into solar cells embedded in the window frames! Our CLEAR Solar Photovoltaic Window Glass can be ...

Despite the abundance of solar radiation, significant energy losses occur due to scattering, reflection, and thermal dissipation. Glass mitigates these losses by functioning as a ...

The NSG Group offers a range of specialised glass and coated glass products used in all of the leading solar energy technologies, including thin film photovoltaics, crystalline silicon photovoltaics, ...
