

# Solar panels belong to industry classification

Manufacturers of renewable energy equipment such as solar modules & cells and solar power systems are classified under the Information Technology and Industrials Sectors, respectively.

NAICS Code 221114 is a North American Industry Classification System (NAICS) 6-digit code that defines a &quot;National Industry&quot; for Solar Electric Power Generation.

The solar power industry is broadly categorized into two main segments: solar panels (photovoltaic systems) and solar thermal systems. Solar panels, also known as photovoltaic (PV) systems, convert ...

Solar panels belong to the renewable energy sector, specifically the solar energy industry, which encompasses the technology and services associated with solar photovoltaic systems, the ...

NAICS was developed under the auspices of the Office of Management and Budget (OMB), and adopted in 1997 to replace the Standard Industrial Classification (SIC) system.

This guide to researching the business of generating and distributing renewable energy focuses on resources related to hydropower, solar, wind, geothermal, and biomass industries as well as the ...

Establishments primarily engaged in installing solar panels or solar heating equipment are classified in Industry Group 2382, Building Equipment Contractors. Get detailed descriptions of NAICS codes to ...

Some of the most renowned companies from every industrial sector, from education to pharmaceutical laboratories, have recognized the potential of solar panels to meet their energy ...

Solar energy in the United States is booming. Along with our partners at Wood Mackenzie Power & Renewables, SEIA tracks trends and trajectories in the solar industry that demonstrate the diverse ...

This U.S. industry comprises establishments primarily engaged in operating solar electric power generation facilities. These facilities use energy from the sun to produce electric energy.
