

We got LG solar panels (AC coupled system) installed by local installers who had excellent ratings and referrals this last Friday. We went on an overnight trip Saturday morning and came home to a very ...

Have you ever entered your home or office and noticed a peculiar burning smell from your inverter? It's an alarming experience that raises immediate concerns.

A strange odor from your solar roof or wiring is more than just an inconvenience; it is a critical warning sign. Ignoring these smells can lead to significant safety hazards, including electrical ...

In fact a strong hot smell usually means a high current circuit, so its prudent to check and re torque all connections in the battery to inverter, charge controller, etc. AC input and output ...

Upon detecting an unusual smell from a wall-mounted solar panel, the first course of action should be to disconnect the power supply. This step is vital to prevent any risk of fire or ...

Over the last couple days, I've noticed a burning electrical smell when I power on the inverter and hit it with some loads. Needless to say, it hasn't been on long!

So I have an se 7600h which was installed back in July. It has worked flawlessly through the summer and fall, but we're now entering the rainy season and i began noticing an odd smell in the garage ...

After new twin 75 watt solar panels were installed (love them) on the rear top edges of the trailer apparently a back draft was caused in my stand pipe. The right rear panel is about 2 inches ...

Hello, I have a delta 2 Max, it didn't want to charge for solar panels, I left it connected at night and in the morning that the sun has risen I found it very hot and smell of burning, I ...

Solar panels, despite their robust design and technical sophistication, can become an unintended repository for unpleasant smells. A thorough understanding of the origins of these odors ...
