

The latest solar PV export data from the world's largest exporter, China, by country or region of destination. Data updated on a monthly basis.

Discover all statistics and data on Solar energy in China now on statista !

Data and analysis including a list of solar power in every country in the world, countries with the most solar power, and countries that generate the highest percentage of their electricity from solar power.

In the first half of 2025, the country installed more than twice as much solar capacity as the rest of the world combined, accounting for 67% of global additions.

The price slashing has taken a severe toll on China's solar companies. Stock prices of its five biggest makers of panels and other equipment have halved in the past 12 months.

As of at least 2024, China has one third of the world's installed solar panel capacity. Most of China's solar power is generated within its western provinces and is transferred to other regions of the country.

The U.S. Department of Commerce issued a final determination Friday that manufacturers of solar panels imported from four Southeast Asian countries circumvented tariffs on ...

Data and analysis including a list of solar power in every country in ...

Today, China's share in all the manufacturing stages of solar panels (such as polysilicon, ingots, wafers, cells and modules) exceeds 80%. This is more than double China's share of global PV demand. In ...

OverviewHistorySolar resourcesSolar photovoltaicsConcentrated solar powerSolar water heatingEffects on the global solar power industryGovernment incentivesChina is the largest market in the world for both photovoltaics (PV) and solar thermal energy. Its PV capacity crossed 1,000 gigawatt (one terawatt, 1 TW) in May 2025. By June 2025, China's PV capacity surpassed 1,100 gigawatt. In 2024, China added 277 gigawatts (GW) of solar power, which was equivalent to 15% of the world's total cumulative installed solar capacity.

Solar energy is the most common, cheapest, and most mature renewable energy technology. With solar photovoltaics taking over recently, an in-depth look into their supply chain ...

China is installing almost twice as much solar and wind power as every other country combined. And it dominates the market. It makes eight out of every 10 solar panels and controls 80...
