

If you invest in renewable energy for your home such as solar, wind, geothermal, fuel cells or battery storage technology, you may qualify for an annual residential clean energy tax credit.

Many tax credits that were extended into the 2030s by the IRA are now ending much sooner, making 2025-2026 a critical window for solar projects. In this updated guide, we'll break down the current ...

Legislative Urgency: The 30% federal solar tax credit faces elimination as early as late 2025, with the House already passing legislation to terminate residential solar incentives. This creates unprecedented ...

The federal solar tax credit for homeowner-owned systems is no longer available. If you're reading this after 2025, use this article to understand how the credit changed--and evaluate solar based on long ...

When you purchase (not lease) new solar-powered equipment that generates electricity or heats water, or purchase solar power storage equipment, you generally can claim the Residential Clean Energy ...

With the federal credit disappearing, homeowners will need to rely more heavily on state and local incentives, financing tools and the steadily falling cost of equipment.

Many of our members have told us how adding solar has allowed them to lower their electric bills or even bring those bills down to zero. But if you're thinking about going solar and...

With a host of tax and incentive programs, there are many reasons for taxpayers to install solar power generation systems. The tax benefits can include income tax credits, breaks on local real estate ...

Homeowners have until December 31, 2025 to install solar panels and lock in the 30% federal tax credit--an average of \$9,000 in savings. A tax attorney EnergySage spoke with believes that, at minimum, ...

Businesses and homeowners across the US are reaping the rewards of their efforts to switch to solar, thanks to a wide range of solar power incentives and tax credits. The US government has rolled out a ...
