

With Australians installing about 300,000 rooftop systems a year, 1 in 3 Aussie homes now have rooftop solar. Solar uptake has been driven by the Small-scale Renewable Energy ...

Australia has seen an explosion in rooftop solar uptake. Tens of thousands of homes and small businesses now host PV (photovoltaic) installations that generate power not only for their own use ...

A new report from the Clean Energy Council (CEC) shows that at the end of June there was a combined 26.8 GW of rooftop solar capacity deployed across 4.2 million homes and small ...

The Clean Energy Council has released its bi-annual Rooftop Solar and Storage Report (July-December 2025), which shows that more than 183,245 battery units were sold in the second ...

Australia's rooftop solar fleet continues to expand with a combined 28.3 GW of generation capacity commissioned by the end of 2025 with approximately 4.3 million installations across the ...

Rooftop solar installations In the first half of 2025 there were 115,584 rooftop solar units installed across Australia. This was 18 per cent lower when compared to the same period 12 months prior. Despite ...

In short: The capacity of rooftop solar will soon exceed that of coal, gas and hydro combined in Australia's main grid, a green energy report finds. There is already almost 20GW of ...

Australia powers ahead on rooftop solar, with new data showing rooftop solar provided 12.8 per cent of the nation's electricity generation in the first half of 2025. The ESOO projects that ...

Australia's rooftop solar capacity has reached 28.3GW, now surpassing coal generation, while home battery installations are soaring. Discover what this means for households and ...
