

Does Tajikistan have hydropower?

Hydropower remains the dominant source of electricity generation, accounting for nearly 98 percent of the country's power mix, with the remainder derived from hydrocarbons and minor sources. Tajikistan's theoretical hydropower potential is estimated at over 527 billion kWh annually--enough to meet Central Asia's energy consumption three times over.

Is Tajikistan expanding its solar energy capacity?

Tajikistan is rapidly expanding its solar energy capacity, with several large-scale projects underway:

Why is Tajikistan upgrading its transmission infrastructure?

Tajikistan is upgrading its transmission infrastructure to support domestic energy needs and regional exports. The 500 kV Datka-Sughd transmission line, developed under the CASA-1000 project, enables energy exports to Pakistan and Afghanistan. Several small- and medium-scale projects were commissioned in early 2025, including:

Is Tajikistan a green country?

Tajikistan aims to add up to 1,500 MW of solar and wind capacity over the next two years, targeting renewables to comprise 10 percent of its energy mix by 2030. The country is committed to achieving a fully green energy transition by 2032 and a green economy by 2037.
