

What is the global EV outlook?

The Global EV Outlook is an annual publication that reports on recent developments in electric mobility around the world. It is developed with the support of members of the Electric Vehicles Initiative (EVI). The report draws on the latest data to assess trends in electric vehicle deployment, demand for their batteries and charging infrastructure.

How many electric cars are there in Ethiopia?

The Ministry of Transport of Ethiopia reports a stock of 100 000 electric vehicles but does not define how many of these are cars. In contrast, EV Volumes reports about 1 300 electric car sales in the past 5 years. IEA. CC BY 4.0. Sources: IEA analysis based on data from EV Volumes.

What is the difference between eV and OEM?

Notes: EV = Electric Vehicles, which include electric cars only in this figure; OEM = original equipment manufacturer. Left and right figures use EV Volumes to represent the sales of Chinese-made electric cars in overseas markets by destination market and OEM headquarters location.

What will China's electric car market look like in 2030?

The Chinese market will be key to watch: it is the largest single car market in the world, and it drives the outlook for global electric car sales in the medium term, accounting for more than half of global electric car sales through 2030 in the STEPS.

Introduction Iran Electric Vehicle Market Size and Forecast Market Dynamics Company Profile This Report Will Answer Following Questions The two-seater vehicle was first produced in Iran under the name "Yooz," which is Persian for "Panther." The traffic law of Iran does not define the two-seater electric car model. This has made it difficult to issue license plates for these vehicles. A total of 100 cars are being produced in pilot production, and the pricing and final evaluation pr...
